

UI Task

Assume that you have an application for employer to add job offers for international company. Application should be available from desktop and mobile device as well. You need to create a form to add new job offer to the list.

Fields that you need to add are:

- Job title
- Job description
- Department name
- Number of available position
- Salary - From
- Salary - To
- Start date
- Ability to attach promotion graphic files
- Contact - Email
- Contact - Phone number
- Contact - Office working hours

Your task is to draw on A4 paper (or equivalent size using your PC) the form layout (with controls types e.g. text box, dropdown, multiple choice etc.) and describe what kind of validation each of the field require.
