

- **Forbidden - automatic 0/7 points**
  - Reflections
  - Absolute file paths
- **-3 points**
  - Inconsistent code style (names of fields, spacing, etc) Hint: Use formatter
  - Lack of proper encapsulation
  - Lack of proper abstraction
  - Casting objects if not explicitly allowed
  - Repeated code
- **-2 points**
  - Commented code left in solution
  - Multiple responsibility methods and functions
  - Variables in more than one language (suggested language: English)
  - Application configuration parameters not properly separated from general code
- **-1 point**
  - Misleading comments
  - More than 3 nested braces in a function

**Disclaimer:** Lab instructors can take away points for other code quality related issues that do not appear on this list. The purpose of this list is to standardize grading across all groups as best as possible but it is impossible to list all specific problems since your solutions will vary greatly.
